VARSHA
UPVC SQUARE RAIN GUTTER

LOCK TO LEAKS
IN A SMART WAY

VARSHA
SMART LEAK LOCKER

HIGH-QUALITY MATERIALS | FIRST TIME IN INDIA
FAST INSTALLATION | 100% LEAK PROOF

Varsha Square Rain Gutter's new product, the Varsha Smart Leak Locker, is an innovative invention by Varsha Plastics, which is one of the market leaders in the plastic industry. Rain gutters are used to solve the leakages that occur in houses during the rainy season. Varsha Smart Leak Locker has been built as a sophisticated system to prevent the leakage faced by the rainwater channels.

This is the first time in India that a leakage locking system is being introduced. Instead of PVC rain gutters which are joined with screws and silicone has been replaced with an innovative system of strong clips and UV protected rubber beading which are used here. Substantial savings in installation time and cost could be achieved by using this smart leak locker instead of screws and silicone. Apart from being the easiest to install, they help to significantly reduce the workload of the working fabrication operator. Manufactured to the highest quality, these smart leak lockers will withstand weather conditions and last longer. The Varsha Smart Leak locker guarantees great value for money.

Instructions to use:

Use only Varsha Smart Leak Locker accessories with Smart UPVC Square Rain gutters.

Screwing the accessories with the gutter is not necessary and filling any type of silicone sealant is not required.

Ensure the rubber beading is inserted properly and clips are fitted correctly before installing the rain gutter.

For efficient holding capacity maintain 80 cm distance between each clamps.

Clip

- High-quality clips
- Strong holding capacity
- Easy to fix

Rubber Beading

- Superior quality material
- UV protected rubber
- Zero water leakage
